

System Objective

- Create QR codes against product serial numbers and print thermal stickers.
- Allow dealer or customer to register warranty by scanning QR.
- Auto-create installation tasks where required.
- Create complaints/service tasks with work type, timeframe and technician payout cost.
- Auto-assign technician by area, product skill, availability and workload.
- Close every task using customer OTP, then add technician payout to monthly ledger.
- Admin settles technician payment at month end by uploading payment receipt.

1. Setup

- Dealer, product, area, technician, front desk, work type cost

2. Dispatch

- Serial entry, bulk upload, QR generation, sticker PDF, dealer mapping

3. Warranty

- Dealer/customer scan QR, OTP verification, warranty ID, call list

4. Service

- Installation, complaint, auto assignment, OTP closure, technician payout

Page 7 - Dashboards, reports and review checklist

How Client Can Use This PDF

Print pages and mark sections to keep/remove/change.

Each module is separated so unwanted parts can be deleted from scope.

Use Page 7 checklist during client meeting for final approval.

Keep Phase 1 simple; add advanced modules later if needed.

Complete End-to-End Flow

High-level process from product setup to technician payment settlement

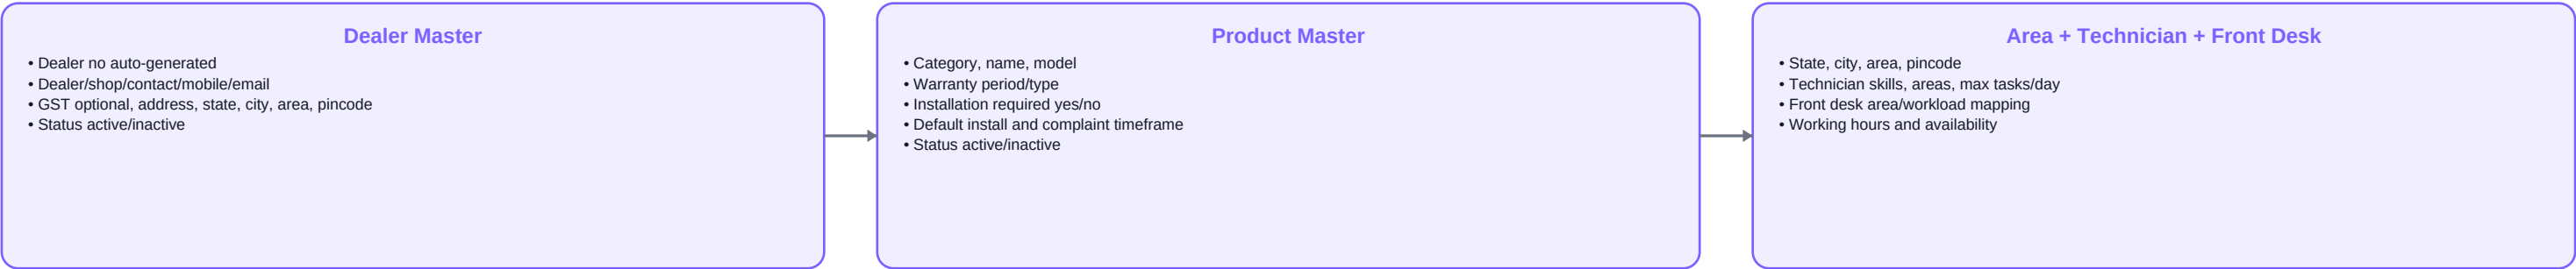

Key Automation	Key Controls	Outputs
Warranty registration creates front desk call task.	Duplicate warranty blocked by serial number.	Warranty ID, task ID and complaint ID.
Installation task auto-created if product requires installation.	Customer cannot change mapped dealer number.	Technician ledger and monthly payment receipt.
Complaint/task auto-assigned to technician by score.	Task cannot close without OTP, remark and photo.	WhatsApp/SMS alerts and dashboard reminders.
Due time calculated from work type/product/priority.	Closed task cost remains fixed even if cost master changes later.	Printable reports for owner and admin.

Setup, QR and Dispatch Flow

Master data and fields required before warranty registration starts

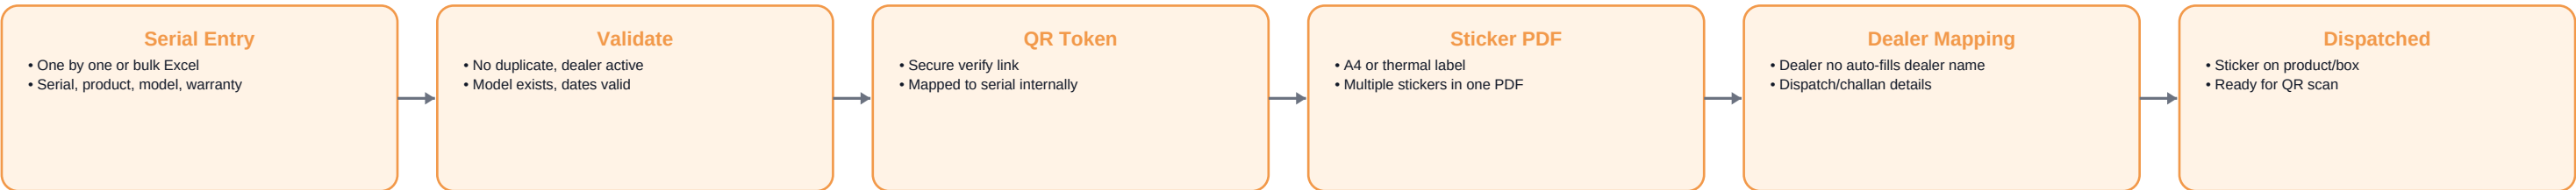

A. Master Setup

B. Work Type Cost Master

Cost Fields	Example Costs	Cost Rule
Work type: repair/install/inspection/revisit	Water purifier installation: Rs.300	Every task must have a work type.
Product category and model optional	Geyser installation: Rs.400	Work type maps cost and timeframe.
Area/city optional	LED TV warranty visit: Rs.250	Closed task cost should stay fixed.
Technician optional	Washing machine repair: Rs.350	Updated cost applies to future tasks only.
Payable cost and default timeframe	Inspection visit: Rs.200	Admin can hold/approve/reject payouts.
Effective date and status	Revisit: Rs.150	Payment settled month-end.

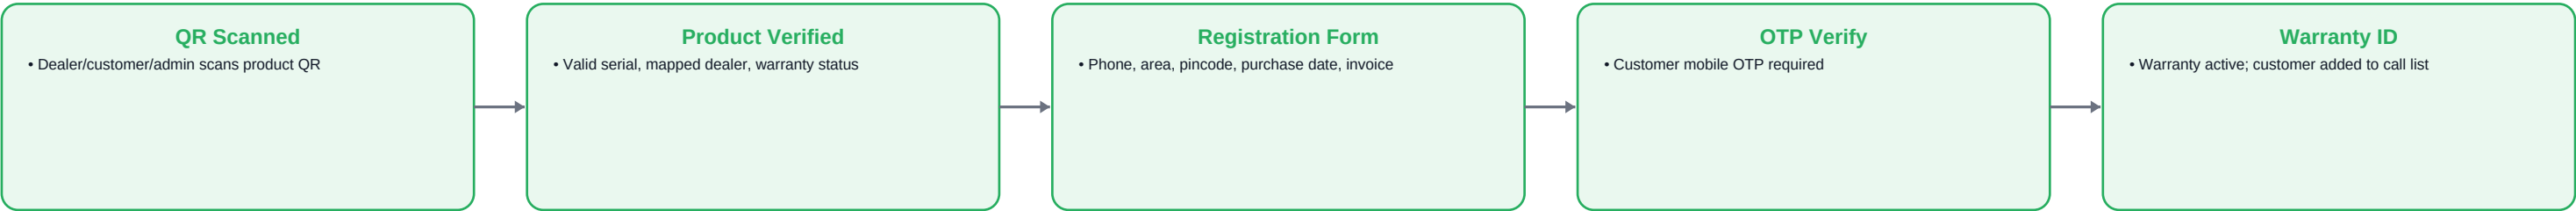

C. Serial, QR and Dispatch

Warranty Registration and Installation Flow

Dealer/customer QR registration, daily call list and product installation task

Dashboards, Reports and Client Review Checklist

Use this page in the meeting to finalize scope

Admin Dashboard Widgets
Total dealers, products, serial numbers, QR codes generated and stickers printed
Warranty registrations today and total active warranties
Installation tasks pending/completed/overdue
Complaints pending/overdue/closed today
Technician pending and upcoming tasks
Technician payable amount and monthly payment pending
Quotation approvals pending
Front desk calls pending/completed

Reports
Dealer-wise, product-wise, customer-wise and area-wise warranty reports
Installation pending/completed/overdue reports
Complaint pending/completed/overdue, product-wise, dealer-wise and technician-wise reports
Technician payable, monthly payment, paid and settled reports
Serial dispatch, QR generated, QR printed and QR reprint reports

Client Scope Review

Print this page and tick/mark changes during client meeting

- ☐ Dealer number format approved? DLR-State-0001 / DLR000001
- ☐ Which products need installation task?
- ☐ What are product-wise warranty periods?
- ☐ What work types should be active from Phase 1?
- ☐ What technician payout rates should be entered first?
- ☐ What timeframe/SLA should apply to each product/work type?
- ☐ Should customer direct warranty registration be allowed for all products?
- ☐ Should dealer be able to raise complaint for customer?
- ☐ WhatsApp only, SMS only or both?
- ☐ Payment status names: Paid / Settled / Written Off?
- ☐ Which reports are needed in Phase 1?
- ☐ Which modules can be postponed to Phase 2?
